

Social Sustainability Pledge

We currently have a Green Team at Claregalway Hotel, and we strongly encourage all staff members to join our Green Team.

At the Claregalway Hotel our ultimate goal of sustainability is to minimize the hotel's impact on the region by reducing the unnecessary use of energy, supporting the use of alternative energy in the form of our CHP plant, solar panels and reducing greenhouse gases in an effort to change the course of global warming.

We are also actively working on both Water Conservation and Waste Management within the hotel across all departments

Over the last three years, we have followed a training programme devised by the environmental consultancy, Fifty Shades Greener along with the Alumni Programme completed in 2023. To date we have achieved a Green Business Gold Achievement awarded by Fifty Shades Greener in 2022 ,2023 and 2024.

We are currently working on achieving an award within Hospitality Green Business Global Certification and are due to complete our audit for this in late January 2025

Claregalway Hotel managers have gone through training which has equipped them with the skills to actively reduce carbon emissions of the workplace by taking control of the resources used at this business.

Our aim at Claregalway Hotel is to bring Sustainable Awareness to All employees in an effort to change their behaviour around what we consider the 3 pillars of sustainability: Energy, Waste and Water and in turn, lessening our workplace's impact on our environment.

Please review our below current Environmental Policy at the Claregalway Hotel.

January 2025
